

WE DIDN'T WRITE THESE:

Various comments received about the new Shell News and its attractive Shell Supplement.

California--"I willingly enclose an extra \$2. for no other publication can equal it in pleasure and information, to me at least."

Illinois--"Your hard-working committee is to be heartily congratulated upon the delightful improvement of the format of the Shell News. I, in common with most of your lucky membership, shall carefully file those well delineated inserts."

Texas--"Congratulations on the new HSN. I was so thrilled when it arrived yesterday I could hardly wait until I finished it, to write and tell you so."

Guam--"Just received the January issue of the HSN. Congratulations to all of you back there. It is certainly a great improvement."

California--"The new look of the HSN is quite something. No other shell club that I know of, gets out anything quite so professional looking and the plates are beautiful."

Kauai--"Hurrah for the new 'Shell News'. It is truly wonderful and deserve a big ovation. The pictures are wonderful and such a treat."

New York--"The remarkably fine HSN arrived today, Jan. 18th. Congratulations, many and more. A wonderful accomplishment for which all serious conchologists must be deeply grateful."

Florida--"Congratulations on the wonderful new format of the HSN. The Weaver 'Hawaiian Marine Mollusks' project is one of the finest we know of. The work and research it entailed will help hundreds of collectors."

Guam--"Congratulations on new HSN. It's a 'beaut', and all photos excellent. Will be proud and eager to receive each succeeding number."

New York--"I am sure others have experienced the very welcome pleasure of seeing and reading the Hawaiian Shell News in its new, beautifully printed and illustrated format. As a publication for the amateur collectors it had hardly a rival before, now it surely has left all others far behind."

"Clifton Weaver's opening portion of 'Hawaiian Marine Mollusks' is great. If continued this will be a most valuable addition to our knowledge of Indo-Pacific Mollusca. It seems hardly credible that this can be done without an extra charge but if such is the case we will all be most fortunate."

PROVISIONAL CHECK LIST OF GASTROPODS RECORDED FROM THE HAWAIIAN CHAIN

(Continued on our next issue)

WE DIDN'T WRITE THESE

Unsolicited comments from various readers, many of whom had no other excuse to write, except to express themselves about the new form of the HSN.

California--"You should be very proud indeed of the new format of the Hawaiian Shell News."

California--"It is indeed a pleasure to read the Hawaiian Shell News, for the improvement of which I wholeheartedly compliment you. You have reason to be proud of this achievement, which serves as an enjoyment to every member who reads it."

California--"The new Hawaiian Shell News is fine, especially those photos of Cliff Weaver's. I will send my other \$2.00 to take care of the increased dues immediately."

New Hampshire--"We enjoyed the Shell News in its old form and congratulate you on the new format." (And the whole family joins for 1960.)

California--"I am afraid that my congratulations are somewhat late, but nevertheless so well deserved that I would like to express them now. This, of course, is in reference to the new format of the Hawaiian Shell News. It is well written, the pictures are good, and the section on Terebra excellent."

Florida--"The 'new' Hawaiian Shell News is fine and very impressive. Let us hope it does not lose its old charm and personal touch."

Honolulu--"Enclosing \$5 for family membership. We both enjoy the 'new' Hawaiian Shell News."

Marshall Islands--"What a beautiful job! I guess by this time the mail box is bulging with letters of congratulations. I believe that Cliff Weaver's papers are going to become collector's items one of these days. I have already made a binder for mine."

Kansas--"Congratulations on a most excellent issue. I am very pleased with your new format, and especially your new supplement."

California--"Congratulations on the New Series of the H.S.N. It is simply wonderful. Cliff Weaver is accomplishing an outstanding paper in his Hawaiian Marine Mollusks."

Florida--"Hearty congratulations on the new HSN. It's a fine job."

Mass--"I do so enjoy the Shell News, and have told several of my friends about your publication. This latest issue with new 'face' and set-up is wonderful, and I wish the magazine SUCCESS."

Philippines--"The new 'Shell News' is most wonderfully printed except that my Grandpa couldn't read it very well. The type was too small."

Shell Exchange (Cont. from page 7)

"please and thank you," she says.

Anselmo G. Pastrano, J. M. Basa St., Iloilo City, the Philippines is a new contact, probably, for some of you. He's interested in Cones, and furnishes quite a list of that genus. He wants to exchange, especially with some one in Japan. All his cones are of Philippine origin at the present time, so it ought to be easy to establish an exchange basis.

PROVISIONAL CHECK LIST OF GASTROPODS RECORDED FROM THE HAWAIIAN CHAIN
