

NOTOTEREBRA

COTTON 1947

T. S. ALBIDA

Nototerebra Cotton, 1947, Rec. S. Austral. Mus. 8 (4): 667.
Type species, *Terebra albida* Gray, 1834, recent, Australia. "Shell ivory white, seldom brownish white, sometimes with a row of small brown spots; shell rather wide; whorls flat; whorls smooth except for sinuous, oblique accretional striae sometimes gathered into groups to form obsolete, very flat, low angular riblets; protoconch of 1½ whorls."
