

PARATREBRA

OLSSON 1967

T.S. ROBUSTA

*Panaterebra* Olsson, 1967, Paleo. Research Inst. p. 14. Type species, *Terebra robusta* Hinds, 1844, recent, Eastern Pacific. "Like *Paraterebra* in general appearance, shell large, robust; sculpture of three, axially ribbed or noded, encircling bands but restricted to a relatively short stretch, the sculpture becomes obsolete on the middle or final sections of the shell; columella with a single fold."
