Terebra elegans Kuster, 1841 Syst. Conch. Cab. Martini &
Chemnitz, ed. 2, 5 (2): 31, pl. 6, fig. 13. The figure looks like
H. strigilata Linnaeus, *H. acumen* Deshayes, or *H. parva*
Baird in Brenchley, but the figure is so small it is impos-
sible to distinguish. Patel (1888) said it is a *Bullia* rather
than a *Terebra*. NOT DUB 02 87
