

Buccinum acus, Gmel. p. 3502. no. 141. ^{1449/2}

Acus sartoria, Martini, t. 4. f. 1451. Espèce indéterminable par la déféctuosité de la figure; il n'est pas bien certain pour nous qu'elle appartienne au genre *Terebra*.
Des H 1255 p 316

ACUS
GML 1791
EXC 1791
Bosc 1801
EXCL

Acus. 141. *B. testa acuta exalbida lineis undulatis horizontalibus, anfractibus bifidis crenulatis rugosis, columella spiraliter torta.*

Martin. *Conch.* 4. t. 154. f. 1449.

Habitat - - - *testa 1 1/2 pollicem circiter longa.*
GML 1791 p 352

Vis pointue, *Terebra acus*.
Aiguë, très-blanche avec des lignes ondulées, horizontales; les tours de spire partagés, crénelés et rugueux; la columelle contournée en spirale.
Martin, *Conch.* 4. tab. 154. fig. 1449.
On ignore son pays natal. Bosc 1801 p 17

There still remain to notice the following species, which were referred by the old authors to that section of *Buccinum* which is now regarded as synonymous with *Terebra*, but which there is much difficulty and doubt in referring to any shells at the present time in our collections:—*Buccinum murinum*, Linn.; *B. acus*, Chemnitz; *B. hecticum*, Gmelin; *B. bifasciatum*, Petiver; *B. concinnum*, Gualtier; *B. succinctum*, Chemnitz; *B. geminum*, Linn.; *B. proximum*, Linn.; *B. monile*, Linn.; *B. sinuatum*, Linn.; and *B. phallus*, Chemnitz, is since known as *Pleurotoma buccinoides*.
HNS 442 p 168

Terebra acus Bosc, 1801, *Hist. Nat. Cog.* 5: 16. This is *Pyramidella acus* (Gmelin, 1791).
EXC 8r. 87

Acus (*Buccinum*), Gmelin. *Syst. Nat.*, p. 3502, No. 141, . 39
UNDETERMINED - TRON 1785

Acus. 148. Shell turreted, subulate; whirls transversely divided, crenulated, and wrinkled; pillar twisted spirally.

Buccinum Acus. Gmelin, p. 3502. *Schreibers Conch.* i. p. 171.

Buccinum, No. 171. *Schroeter Einl.* i. p. 401.

Martini, iv. p. 297. t. 154. f. 1449.

Inhabits —

Shell near an inch and a half long, and about one sixth as broad, whitish, with horizontal undulated lines.
DRLW-117 p 649
